A MESSAGE FROM OUR FOUNDER

# Consistency is the *product we sell.*

“

India grows one of the world's widest ranges of herbs, seeds, fruits and vegetables, from Ayurvedic roots such as ashwagandha to the makhana of Bihar's wetlands. For international buyers, availability has never been the problem. Consistency has: knowing that what arrives matches what was agreed.

I founded Damodarr Global Venture LLP to close that gap. We work to written specifications, we support every shipment with complete documentation, and we treat each commitment on quality, quantity and timing as one we expect to be measured against.

Our model is built on long-term partnerships, not one-off trades. Through a qualified supplier network across India, our processing centre in Jetpur and our export desk in Ahmedabad, we give importers, distributors and brand owners a single, accountable point of contact for Indian agricultural ingredients.

Quality is not a department at Damodarr; it is how we earn repeat business. I invite you to test us with a specification, a sample or a trial order, and to judge us shipment by shipment.
